**ENGINE**

1,494 cc four-stroke, Rotax with three cylinders in-line and four valves per cylinder

Equipped with Advanced Combustion Efficiency (ACE™) technology, this powerful engine comes with a maintenance-free supercharger\* and external intercooler and is optimized for regular fuel for lower fuel cost.

iTC™ (Intelligent Throttle Control) system

Operating electronically, this advanced throttle system starts you in neutral for easier dockside starts. It also features activity-specific Touring, Sport and ECO® modes that can all be set to accommodate your riding style. The result is a more responsive, more intuitive ride.

iControl® Learning Key®

The programmable Learning Key allows you to limit the performance of the PWC based on rider skill-level.

D-Sea-Bel™ system

Combines a series of resonators and vibration-absorbing components to make Sea-Doo watercraft some of the quietest on the water.

Closed-Loop Cooling System

Uses coolant to keep the engine running at the ideal temperature, much like a car's radiator. Also keeps out corrosive saltwater and debris.

**FEATURES**

iControl®

The "Brain" that integrates and controls all systems to create the best possible ride.

ST<sup>3</sup> Hull™

The new benchmark for rough water handling, the fully redesigned ST<sup>3</sup> hull™ is wider, for industry-leading stability at both rest and high speeds and expertly tuned to improve offshore performance.

Touring Mode / Sport Mode

Offers a choice between two throttle responses for different riding styles. Touring mode is the default setting offering a more progressive acceleration curve for a more confident ride – ideal for cruising and 2-up riding. Sport mode can be easily activated using the Sport button. It provides full acceleration performance for a more aggressive throttle response.

ECO® Mode

This iTC function automatically determines the most economical power delivery and sets the optimal RPM for greatest fuel economy.

Ergolock™ Seat

Seat with narrow profile and knee support that lets riders sit in a more natural position and lock in with their legs for more control and less upper body fatigue.

RF D.E.S.S.™ Key

With radio frequency technology and a ball-and-socket design, the Digitally Encoded Security System (D.E.S.S.) key provides riders with easy and quick starts every time.

Interactive Multifunction Digital Information Center

Cruise control, Slow mode, VTS™, Fuel level, Tachometer, Speedometer, Hour meter, Compass, Clock, Touring mode, Sport mode, ECO® mode, F-N-R indicator and more.

New Reboarding Ladder

Now deeper and wider, it makes reboarding from the water easier and quicker

Direct Access Front Storage

Gear is now within arm's reach. The industry's first direct-access front storage opens by simply raising the handlebar assembly. No standing required.

Watertight Phone Box Compartment

Waterproof and shockproof phone compartment

LinQ™ Attachment System

Exclusive quick-attach system on the swim platform allows for easy installation of storage accessories.

**WAKE PRO 230**

**PROPULSION SYSTEM**

iBR® (Intelligent Brake & Reverse) System

First and only true brake on a watercraft recognized by the U.S. Coast Guard for improving boating safety since 2009. Now in its 3<sup>rd</sup> generation, the intuitive and improved iBR® allows you to stop close to 160 feet sooner<sup>2</sup> for greater peace of mind. All with the squeeze of a lever. And with its electronic reverse, it gives you a level of maneuverability that makes docking easier.

Stainless Steel Impeller

Delivers improved acceleration, higher top speed and less cavitation.

**WAKE PACKAGE**

Speed-Based Ski Mode

This advanced iControl® feature allows the driver to adjust the intensity of the launch for different rider skill levels and tow sports while maintaining a constant speed. You get 5 acceleration profiles for the best possible tow sports experience.

LinQ™ Retractable Ski Pylon

Enjoy a higher tow point thanks to the quick install retractable ski pylon that stows away when not in use. Features spotter handgrips and rope storage.

Removable Wakeboard Rack

Provides easy transport of a wakeboard to the ride site.

High-Performance VTS™ (Variable Trim System)

The VTS™ adjusts the angle of the nozzle to change the behavior of the watercraft and improve parallelism to the water. The high-performance VTS™ provides pre-set positions for quick settings.
